WORK EXPERIENCE

Thopstech Career Solutions Pvt Ltd.

Backend Developer

Sep 2023 - Present

- Built and maintained custom websites for clients, increasing client satisfaction by 30%
- Integrated third-party APIs to extend website functionalities, boosting user engagement by 20%
- Collaborated with designers to achieve responsive and user-friendly interfaces, resulting in a 15% decrease in bounce rates

EDUCATION

Gitams Business and IT School, Kadapa

MCA - Focused on Software Development - 8.1

Sep 2023 - Present

- A deep dive into application development and tech leadership

Sri Ramakrishna Degree College

Bachelor of Commerce(CA) - 7.8

Oct 2020 - June 2023

PROJECTS

Dynaminc VM Scaling Provisioning and Pricing through an Online Auction-Python

Jan 2025 - Present

- To build a dynamic cloud resource marketplace, we leveraged container orchestration (Kubernetes) and cloud platform services (AWS/Azure/GCP).
- The core auction logic, essential for real-time VM pricing, was developed using Python (Flask/Django) and database system (MySQL).
- Automated scaling and provisioning, driven by demand, were implemented using Infrastructure as Code (Terraform/Ansible) and message queues (RabbitMQ/Kafka).
- API Gateways were crucial for secure and efficient communication between users and the auction engine, facilitating bidding and resource management.
- Comprehensive monitoring with Prometheus and Grafana ensures optimal performance and resource utilization within the dynamic VM scaling and pricing system.

SKILLS

- Programming Languages: Python (Intermediate), JavaScript (Intermediate), HTML5 (Intermediate), CSS3 (Basic), SQL (Intermediate), Bash (Basic)
- Web Frameworks: Django (Intermediate), React (Basic), Django-REST
- Tools & Platforms: Git (Intermediate), VS Code, Workbench, Github, SDLC, Agile Methodology, System Design, Testing
- Databases: MySQL (Intermediate), SQLite (Intermediate)
- Interpersonal Proficiencies: Problem-Solving, Communication, Collaboration, Analytical Thinking

CERTIFICATE

Certified Entry-Level Python Programmer (PCEP-30-02) [🔗](#)

- Hands-on project experience building scalable web applications
- Effectively balanced coursework with software development internship responsibilities (Part-time)

Django Essential Training

- **Understanding Django Framework** – Learn the core concepts of Django, including **MVC (Model-View-Controller) architecture**, URL routing, templates, models, and ORM (Object-Relational Mapping).
- **Building and Deploying Web Applications** – Gain hands-on experience in **creating dynamic web applications**, handling forms, user authentication, and deploying projects using **Django's built-in tools** and cloud platforms.
